LBTEC TİC. LTD. ŞTİ., is manufacturer and trader company with wide variety of coagulants, polymers and treatment technologies to industries, potable water plants and waste water treatment plants. Our company is constituted by an excellently organised team of specialized scientists such as chemical engineers, environmental engineers, chemists and mechanical engineers that collaborate with each other for a common objective: To comprehend the need and expectations of each customer and provide most suitable solution. Beside of chemical supply and production, LBTEC TİC. LTD. ŞTİ., is providing consultancy, mechanical support and construction projects to industries, potable water plants and waste water treatment plants by an expert team.

LBTEC TİC. LTD. ŞTİ., evaluate each industries application one by one to achieve best solution for your process with experience and developed technologies. Our expert team all time support and work with you to find optimum solution in case of all mechanical may encounter in wastewater treatment plants, disturbance in the process, foam problems, odor problems, rapid changes in the microorganisms concentration, high BOD concentrations, high COD values, corrosion problem in tanks.

For the new industries and new customers, we supply and provide detailed support to determine best valuable help by examine their operation process, characteristics of wastewater, chemical materials which in use and plant structures. Also we provide consulting and construction services to our customers.

Within this context, we work for improve the operating conditions, achieve a more efficient wastewater outlet, optimize the problems which encountered in the process flow and minimize the operation cost and energy consumption by optimize chemical dosage amount.

The scope of quality and sustainability, we apply monthly tests like turbidity, conductivity, COD, TSS, colour and pH on input and output samples of our existing customers to see and achieve efficiency of wastewater treatment and present them as a monthly report. This also gains advantage to our customers to have an external consultant and they can able to show this reports to related authorities.

The most important things when we evaluate our customer are; design and calculate a minimum cost of energy for suitable operation, and explore the best way to optimize chemical consumption. We all time work with you until find a appropriate solution and also keep our focus on your process to ensure sustainable process.

LBTEC TİC.LTD.ŞTİ., is not only a chemical supplier company. Beside that we provide high quality products, we continuously following our customer needs, creating and researching possible solution for your plants as a your work partner and also with experienced technical team support you during the all process.

INDUSTRIES WE SERVE

- Municipalities
- Textile / Dyeing Industries
- Mining % Mineral Processing
- Refineries
- Food & Beverage
- Sugar Mills
- Pulp & Paper Mills
- Detergent & Cleaning Industries

TECNICAL SUPPORT & SERVICES

- Customer Visits
- Monthly Test Applies
- Situ Measurements
- Mechanical Support
- Process Control
- Process Consultancy
- Construction & Development

WATER TREATMENT PRODUCTS

- Inorganic Coagulants
- cationic /anionic Polymers
- Decolorants
- Activated Carbons
- Bacteria & Microorganisms
- Antifoam Products
- Odour Preventing Products
- System Cleaning Chemicals
- Desinfection Chemicals
